

# THE NEXT GEN FILTER MEDIA

**Ultra-Filtration Glass is a direct replacement for sand, improving the performance of sand filters without having to replace existing units.**

**Bio-resistant.** Prevents bacterial growth in the filter bed;

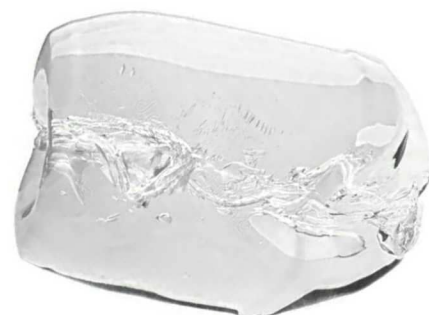

**Fine filtration.** 50% more surface area than transitional sand;

**Water saving.** UFG is 20% lighter than sand thus save 10% of water during backwash;

**Less chemical.** Reduced water consumption means less chemical added;

**Last longer.** Replacement period up to 10 years;

**100% Virgin Material.** Not from recycle yard.

## Specification
